The Quality Assurance Inspector (QAI), Scott Croff, was present at the Self Anchored Span (SAS) job site to observe the scheduled fabrication and welding of components for the SFOBB project.

The QAI observed ABF activities at the Pier 7 location. The QAI did not observe any Quality Control (QC) Inspectors present. The QAI noted that ABF personnel are setting construction equipment into the OBG segment 5W and grinding the base metal edges to prep the field splice welding. The QAI noted that ABF personnel are welding on barges and job related equipment. The QAI also noted that the contractor is assembling parts of the temporary trestle on the barges at Pier 7. The QAI did not observe any personnel welding on bridge components. The QAI noted that this work was in progress until the end of the shift. The QAI was informed that the receiving inspection for OBG segment 6W will be performed tomorrow, 5-12-2010. The QAI noted that there are still temporary shipping braces visible inside the OBG segment.

The QAI reviewed contract related documents including the submitted and approved Welding Quality Control Plan (WQCP) and approved revisions to the WQCP and newly issued ABFJV non-conformance reports. The QAI updated the records of the non-conforming incident reports and also the contractor's submitted requests for information. The QAI continued reviewing the contractor's submitted welding reports, submittal # 1536 Revision 4. The review was in progress at the end of this shift.

**Summary of Conversations:**

The QAI had general conversations with ABF and Caltrans personnel during this shift. Except as described above, there were no other notable conversations or observations.
